Profile

Computer Engineering student with strong skills in software development, web design, and AI. Proficient in C, C++, Python, and JavaScript with hands-on experience in HTML, CSS, and Tailwind CSS. Passionate about building practical solutions and exploring machine learning. Seeking an internship to apply and expand my skills in real-world environments.

Skills

- Languages: C, C++, Python, JavaScript, PHP, ML, RL
- Web: HTML, CSS, Tailwind CSS, Bootstrap, Node.js
- Tools: Git, VS Code, Visual Studio
- Other: Problem-solving, Debugging, Teamwork, Project Management

Education

Purvanchal University, BE in Computer

Dec 2020 – August 2025

- **Coursework:** DSA, Computational Theory

Projects

Class Portal

github.com/DahalSuyog/Class-Portal

- A Web Application to Manage Communication between Administrators, Teachers, and Students.
- Tools Used: HTML, CSS, JavaScript, PHP, MySQL
- Full-stack development with dynamic dashboards for user roles

RL Dangerous Dave

github.com/DahalSuyog/RL-Dangerous-dave

- Created a Reinforcement Learning agent to play the classic platformer 'Dangerous Dave.'
- Tools used: Python, OpenAI Gym, Reinforcement Learning
- Built a custom game environment
- Trained agent using RL algorithms to complete levels based on reward feedback
- Demonstrated successful autonomous gameplay through trial-and-error learning

Traffic System Optimization

github.com/DahalSuyog/Traffic-Signal-Optimization

- Built a system for vehicle density detection using image processing and applied fuzzy logic for signal logic
- Tools Used: Python, Streamlit, R-CNN, Fuzzy Logic
- Built a custom UI to observe traffic footage on which image detection and fuzzy logic is performed

Maze-Runner

github.com/DahalSuyog/MazeRunner

- A 2D maze game where players navigate increasingly difficult levels
- Tools Used: C, Turbo C
- Designed interactive UI and implemented game logic

Technologies

Languages: C++, C, SQL, JavaScript, HTML, PHP, CSS, Python

Technologies: VS Code, Pycharm, Streamlit, Git
